

Electronic components

Sacchi Elettronica provides electronic and electromechanical components for the electronic industry. Prestigious manufacturers have entrusted the distribution of their components to Sacchi Elettronica due to its technological know-how and also to a consolidated collaboration.

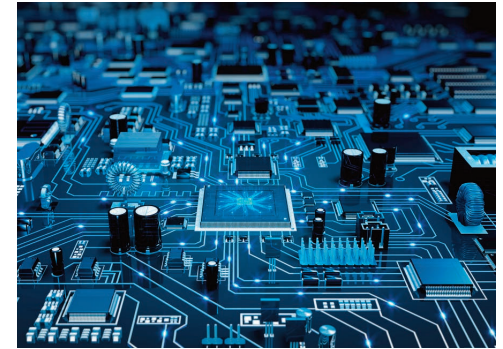

Wound components

Sacchi Elettronica manufactures and designs wound components for professional applications. It covers a wide range of industry sectors and makes use of high quality raw materials in compliance with regulations.

Cabling for electronics

Sacchi Elettronica produces special cables for high-tech applications thanks to the experience and expertise of internal resources. Skilled and qualified staff utilises patented processes and equipment, developed internally.

Electronic Manufacturing Services

Sacchi Elettronica ensures the high quality production of printed circuit board assemblies, thanks to modern SMT assembly lines, which apart from being modern, are also efficient and precise at the same time. Qualified personnel follows constantly monitored assembly procedures.

Original Design Manufacturer – Software

Sacchi Elettronica provides a Software and Firmware design service of high professional competence and valuable experience, gained in various professional fields.

Original Design Manufacturer – Hardware

Sacchi Elettronica offers a Hardware design service of high competence and valuable experience, gained in various professional fields.

Electronic devices

Sacchi Elettronica supplies equipment for electronic systems from the simplest to the most complex and with the support of experienced staff which is constantly kept up to date selects innovative products in step with technology in the most advanced sectors such as security, video surveillance, building automation.

Systems Integrator

Sacchi Elettronica offers a service and technical assistance provided by specialists in the assembly, configuration, commissioning, testing of complex systems in the building automation sectors.
